

## HEPA Fan/Filter Unit

### Features

- ISO 5 (Class 100) conditions
- Easy installation with provided brackets, no hood changes required
- Primary filter is easy to change, with only six single-fastener catch plates
- Variable speed control allows for motor speed change to be adjusted as filter loading increases.
- Lightweight, "Slim Line" aluminum housing

### Specifications

- High Efficiency Particulate Air (HEPA) filter rated 99.99% efficient at 0.3 microns
- Disposable, pre-filters rated MERV 8
- Power cord provided to match current fan/filter unit (barrel connector for hard-wired lines, appropriate plug for socketed lines)
- Noise levels less than 64dba
