

EZCLEAN™ Vacuum Manifolds

FEATURES

- Eliminates sealant used in vacuum manifolds produced prior to 2017.
- Replaces set screws with thumb screws, eliminating the need for tools in opening/closing the manifold allowing operators to easily clean the interior of the manifold without involving maintenance staff.
- Employs two easily replaced seal rings, ensuring airtightness under extended production conditions.
- Available as a seamless replacement for all 3 to 10-lane vacuum manifolds in both standard and split styles without the need to replace other parts.

Engineering inc.

ONLINE Engineering inc. is a global supplier of petri dish filling machines, test tube filling machines, bottle filling machines and other prepared media production equipment. We understand that a quick return-on-investment is important. Our goal is to provide quality equipment and service that significantly contribute to your success.
